

# Our commitments at COSUCRA

## Food safety

The stability of our processes must provide **us** with permanent control over the ingredients that leave our plants, in accordance with the laws and specifications required by our customers. Our quality system at all our plants is developed according to the requirements of the HACCP method and is certified by **the FASFC** and the **FSSC22000 and FCA** standards.

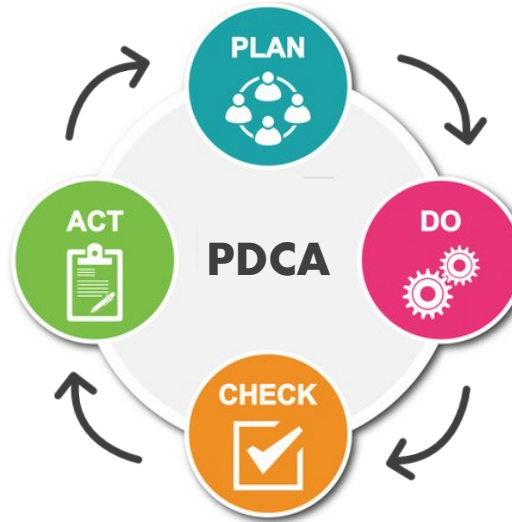

## Environmental impact

**We** aim for the sustainable development of our business by striking a balance between economic activity, environmental protection and social values. We comply with existing environmental legislation. To lend more weight and credibility to our approach, our environmental management system is certified in compliance with the **ISO 14001** standard.

## Human safety

**We** are developing a **risk management system** to meet prevention objectives in accordance with the legislation in force, in all the areas of occupational well-being. We formulate plans that include the measures planned to achieve the objectives of reduction in accidents, to avoid occupational diseases and improve working conditions.

## Social and ethical responsibility

**We** adhere to the **SEDEX** (Supplier Ethical Data Exchange) and respect the internationally recognized **ETI** (Ethical Trading Initiative) code of ethics. Our **Human Resources Management policy** respects the existing legislation and ensures free choice of employment, freedom of association and collective bargaining, and freedom from discrimination and harsh or inhuman treatment within our company.
